## What is a personal care home?

Personal Care Homes (PCHs) are residences that provide shelter, meals, supervision, and assistance with personal care tasks, typically for older people, or people with physical, behavioral, health, or cognitive disabilities who are unable to care for themselves but do not need nursing home or medical care.

Typical services provided are assistance with eating/drinking, light housekeeping, personal hygiene assistance, transportation to appointments, errand running, assisting with medications, and other ADLs (activities of daily living).
